

TOPIC 6 — AI FITNESS INSTAGRAM CAPTION GENERATOR

Capstone Submission & Validation Report

1. Project Overview

Project: Fitness Caption Generator Workspace

Purpose: Generate energetic, punchy Instagram captions under 60 words for an active fitness brand while enforcing brand voice, formatting, safety, variety, and prompt-protection rules.

2. Source Documents

01	Fitness Brand Guidelines	Brand voice, caption rules, blacklist, health safeguards
02	High-Performing Caption Examples	Few-shot style guidance and sample outputs
03	Fitness Content Briefs & Test Set	Reusable briefs and validation flows

3. Core Configuration

- Brand voice: supportive, energetic, bold, modern.
- Caption limit: under 60 words.
- Sentence style: short and scannable; at least two caption sentences under 5 words.
- Emoji limit: exactly 2–3 emojis.
- Required output: Caption → Visual/Content Suggestion → Hashtags.
- Hashtags: 3–5 space-separated hashtags on one line.
- Corporate blacklist: Introducing, Buy now, and the specified purchase phrase.
- Optional Core Benefit input; no unsupported benefits are invented.
- No medical claims or guaranteed physical transformations.
- Repeated briefs must produce meaningfully different variations.
- Prompt injection protection returns: “I am your fitness caption writer”.

4. Validation Results

Test	Result	Evidence
Standard Brief	PASS	Valid 3-section caption; concise, 2–3 emojis, CTA, hashtags
Repeat Brief / Variety	PASS	Second identical brief produced different wording and visual direction
Prompt Injection	PASS	Returned configured protection response
Medical / Health Claim Safety	PASS	Unsafe claim was removed and rewritten safely

5. Submission Evidence

6. LMS Submission Notes

The demonstration covers the project workspace, source documents, custom instructions, standard generation, repeated-brief variation, prompt-injection protection, and health-claim safety validation.

All supporting source documents and this submission report can be included in the GitHub repository as assessment evidence.

7. Limitations & Assumptions

This capstone uses fictional fitness-brand content and source examples for demonstration. Product benefits should remain limited to information supplied by the user or approved sources. Generated captions should be reviewed before real-world publication.
